High quality products to enhance the nation and satisfy the world

山东球墨铸铁管有限公司

SHANDONG DUCTILE IRON PIPES CO.,LTD

**Mission:** Provide satisfying products and services for customers

**Core Value:** Joint Creation, Joint Progress, Win-Win

**Managerial Tenet:** Quality Wins Market, Honesty Creates Future

**Spirit:** Faith, Persistence, Innovation

SHANDONG DUCTILE IRON PIPES CO., LTD.

Shandong Ductile Iron Pipes Co.,Ltd, established in 1957, is the subsidiary company of Shandong Steel Group. The registered capital is RMB 410 million. The first heat of metal and the first piece of ductile iron pipe of Shandong province were produced here.

Shandong Steel Group is a large iron and steel enterprise, with iron and steel research and production as the major business, aiming to produce the high-end, high quality, and high efficiency products. With the total assets reaching RMB 143.1 billion, the company was listed "China Top 500 Enterprises" (ranking 73rd) and "China Top 500 Manufacturers" (ranking 28th) in 2011. The company has excellent credit and wins the AAA credit rating. Shandong Ductile Iron Pipes Co., Ltd imported the world-leading water-cooled centrifugal casting equipment in 1989, and began to produce ductile iron pipes. It is the first one that produces such pipes according to ISO2531 (GB13295) in China. With constant development and accumulation for the past 50 years, the company's total assets have reached RMB 1.3 billion. The annual capacity of pig iron is more than 1 million tons while the annual capacity of DN80-1400mm ductile iron pipes is more than 400 thousand tons. The products sell well home and abroad.

"Provincial Level Clean Factory" Shandong Ductile Iron Pipes Co., Ltd is located in the east part of the beautiful Spring City Jinan, China. It is only 8 km from Jinan-Qingdao highway, 15 km from Jinan international airport and 360 km from Qingdao Port. The exclusive Jinan-Qingdao railway passes the company site.

Friendly Shandong welcomes you.

## 认证和标准

### Certificates & Standrds >>>

公司始终坚持和贯彻“质量是企业生存之本，为用户提供满意的产品和服务是我们永恒的追求”的质量方针。生铁产品荣获国家“银牌”奖和“全国用户满意产品”称号；球墨铸铁管系列产品获山东省名牌产品称号，被评为国家冶金产品实物质量金杯奖，并在国家技术监督局组织的同行业产品用户调查中，荣获铸管行业第一品牌称号。公司于1999年就通过质量体系认证，瑞士“SGS ISO9001”质量管理体系认证，瑞士SGS产品质量认证，ISO14001环境管理体系、OSH18001职业安全健康管理认证，形成了完善的管理体系。产品执行ISO2531/EN545/EN598/GB13295标准

The company always put quality at the first place, and is committed to providing satisfying products and services for our customers. The pig iron was awarded the Silver Medal and the “Nationwide Customer Satisfaction Product” in China. The ductile iron pipes won the prize of “Shandong Famous Brand”, “Gold Prize for Quality of Metallurgical Products” and honored as the “First Brand” in an industry survey by the National Technology Supervisory Bureau.

The company has developed perfect management system. In 1999, it has passed the Swiss SGS Quality system ISO9001 certification, Environmental Management System ISO14001 ertification, and the OSHMS 18001 certification.

Complying with ISO2531/EN545/EN598/GB13295 standards.

# 球铁管的耐腐蚀性

## Corrosion Protection >>>

### 1.1 球墨铸铁管的耐腐蚀性

#### The corrosion protection property

铸铁管具有良好的耐腐蚀性，世界上已埋设 300 年以上的铸铁管道至今仍在使用的，埋设 100 年以上的铸铁管现今仍在使用的更是不胜枚举。关于使用球墨铸铁管，尽管只有 30 多年的历史，但其耐腐蚀性和铸铁管同样良好。

The cast iron has perfect anti-corrosion property, according to the record, There were cast iron pipelines layed over 300 years ago still in use , and countless cases show that cast iron pipes have more than 100 years of service life. As regard to the using of ductile iron pipes, the history is over 30 years. But ductile cast iron is nearly identical to gray cast iron in chemical composition. It also contains far more silicon, carbon and other elements than steel. The resistance of ductile cast iron to corrosion is also similar to that of gray cast iron. This has been demonstrated in use and proved empirically.

### 1.2 管道的耐腐蚀性

#### Corrosion protection of pipeline

用于输送自来水和煤气的球铁管管道，埋设在土壤里，最先就受到周围土壤的化学和物理性能等极大的影响，当管子排成长距离的管道形成一条连续的通电实体时，则是造成管道腐蚀的重大因素，换句话说，土壤的腐蚀按照埋设管道的不同，不会显示同样的结构特性，基于这种差异，形成浓氧差电池，浓差电池等局部电池的可能性就强，因此铺设一条贯穿在这样土壤的通电实体时，就会产生长线电流，而该电流的阳极部分将会形成非常激烈的腐蚀。采用焊接接口的钢管管道就是很好的例证。但是球铁管管道其接口是采用橡胶圈机械接口或“T”型接口，具有绝缘性能，因此，在整条管道中每 4-6 米就有一个绝缘接口，这样整条管道就不可能成为通电实体。

It is true that the underground ductile iron pipeline transferring potable water and gas will be greatly influenced by the chemical and physical property of the soil directly . The most important factor that result to corrosion is when pipes are jointed to be a long and continuous electrify entity. In other words, the soil corrosion will show different features on the different pipelines. Based on this difference, it forms concentration cell. Partial cell possibility of the concentration cell will be very strong. If laying a electrify entity in the soil will bring long line of electric current and then the current anode will form very aboil corrosion. The welded steel pipeline is an abvious example. Ductile iron pipe, owing to it's mechanical or T type joint and sealed by insulating rubber gasket , there is an insulation joint every 4-6 meters.

### 1.3 球墨铸铁管的耐电蚀性

#### Resistance to corrosion caused by electric current

一般埋设于地下的金属导体都能测定出一定容量的电流，由这种电流而引起的金属体腐蚀现象称为电蚀。球铁管由于电阻较大，故不易产生电腐蚀。

Since ductile iron has relatively high electric resistance, it is resistance to corrosion caused by electric current.

## Product Performance &gt;&gt;&gt;

## 产品性能

**抗内压性能：**离心球墨铸铁具有铁的本质，钢的性能，因此，球墨铸铁管比其他材质的管道有更加优秀的安全保障。其工作压力的设计计算值比其他大部分材质的管道的工作压力都高，管道的安全系数非常高，实际管道可能的爆裂压力是工作压力的3倍。

**The performance of internal pressure resistance:** Centrifugal ductile iron has the essence of iron and the performance of steel, so the ductile iron pipes have excellent security performance than pipes made from other materials. The designed working pressure is much higher than that of pipes made from other materials, and the possible burst pressure is three times of the working pressure.

**抗外压性能：**球墨铸铁管的高抗压性可以降低管床和保护层制作的要求，使管道铺设及可靠又经济。

**The performance of outer pressure resistance:** The high pressure resistance can avoid the requirement of the pipe bed and protective cover, making the pipes laying reliable and economic.

**内防腐层：**球墨铸铁管内部采用的是离心涂覆的水泥砂浆保护层。水泥内衬质量符合国际标准 ISO4179，保证砂浆非常坚固密实、光滑、不脱落、不结垢，并且厚薄均匀，确保管道内部输送的饮用水得到无微不至的保护。

**Inner anti-corrosion layer:** The inner layers of ductile iron pipes are centrifugally sprayed with cement mortar. Cement lining complies with the international standard ISO4179, ensuring the mortar strong and smooth. The mortar coating will not fall off or foul, and its thickness is even, ensuring the drinking water transferred by the pipes get good protection.

**外防腐层：**球墨铸铁管的喷锌层能通过锌与铁的电化学作用，对管道起到主动的保护作用。外涂高氯化树脂漆，更增强了管道的防腐性能。

我公司的每根球墨铸铁管外表面最小喷锌量不小于  $130\text{g}/\text{m}^2$ ，符合 ISO8179 标准。也可根据用户需求增加喷锌厚度或喷涂锌铝合金层。

**Protective coating:** The zinc spraying of ductile iron pipes could protect the pipes proactively through the electrochemical effect of zinc and iron. With the high chlorinated resin paint, the pipes will get enhanced anti-corrosion protection.

The surface zinc spraying of each pipe is not less than  $130\text{g}/\text{m}^2$ , and complies with ISO8179 standard. We can also increase the zinc spraying thickness or spray zinc & aluminum alloy layer according to the customers' demand.

**接口—T型胶圈：**T型胶圈安装快捷、简单和方便，并且能承受较大的偏转角度和较大的公差，对施工的要求不高。T型密封胶圈是一种自密封胶圈，在安装时只要简单地将插口装入承口，压紧胶圈，就能保证胶圈的密封性。

**Joint-T type rubber gasket:** The installation of T type rubber gasket is quick simple, and convenient. Such gaskets can bear larger deflection angle and tolerance, lowering the technical requirement of installation. T type rubber gasket is a kind of self-sealed gasket, and the installation just requires putting the socket into the bell mouth and pressing the gasket tight, thus guaranteeing the sealing performance of gaskets.
